PROFESSIONAL SUMMARY

Computer Science student at Air University with hands-on experience developing full-stack and real-time web applications using modern JavaScript technologies. Built and deployed production-ready projects featuring real-time communication, API integrations, and scalable backend systems. Seeking Software Engineering or Full-Stack Development internships where I can contribute while continuing to grow as a developer.

EDUCATION

Air University, Islamabad

Expected Graduation: 2029

Bachelor of Science in Computer Science CGPA: 3.55/4.00

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, TypeScript

Frontend: React, Next.js, React Native, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js

Databases: MongoDB, SQLite

Developer Tools: Git, GitHub, Docker, Linux, Bash, Vercel, VS Code

Technologies: REST APIs, Socket.IO, Monaco Editor, Judge0 API, Gemini API

PROJECTS

CodeDuel | *TypeScript, Next.js, React, Express.js, Socket.IO, Docker, Judge0 API, Gemini API* codeduel.live

- Engineered a real-time 1v1 competitive coding platform featuring synchronized coding sessions, automated code evaluation, and low-latency multiplayer communication.
- Integrated Judge0 API for secure multi-language code execution with a Node.js child-process fallback to improve execution reliability.
- Implemented Socket.IO-powered room synchronization, Monaco Editor integration, responsive UI, and Docker-based deployment across Vercel and a Linux VPS.
- Designed, developed, and deployed the platform independently, supporting 1000+ real-time competitive coding matches through production deployments on Vercel and a Linux VPS.

Encrypto | *C++, SQLite, Bash, Linux* [GitHub](#)

- Developed a desktop encryption application implementing multiple encryption algorithms with persistent SQLite data storage.
- Applied object-oriented programming principles, modular software design, and file handling to build a maintainable codebase.
- Created Bash automation scripts for installation and setup on Linux systems while managing version control with Git.

MediTrack | *Java, JavaFX*

- Led a team in developing a JavaFX desktop application for managing medicines, prescriptions, and personal health records.
- Implemented object-oriented architecture and persistent file handling to efficiently manage user health information.

CERTIFICATIONS

Harvard University

CS50x: Introduction to Computer Science

ACHIEVEMENTS

CEATS National Mathematics/Science Competition, Pakistan

Secured 1st Place (Provincial Level)
